Proline Honda GX270 And HP500 Engine – Pump Combo (*Local Pickup Only)

OUTSTANDING DREDGE VACUUM AND LONG LIFE

Proline manufactures one of the most comprehensive series of

pumps in the small dredge industry today. These are high performance centrifugal pumps designed specifically for operating our dredges and dual-purpose machines. First, they are cast in the US from high quality aluminum then heat treated to a “T-6” hardness for years of service. Each part is then machined on computer controlled equipment to maintain the exact tolerances required for optimum performance. Proline pumps are 5-vane and 6-vane “aggressive bite” impellers with large intake throats to provide high volume with working pressure greater than normally found on pumps of this type. They are hand-assembled using US made seals and grade 8 hardware. The quality and performance of these units, when coupled with Proline’s efficient jetting systems, offers outstanding dredge vacuum, very little required service, and long life.

Product Short Description :

Honda GX270 Engine & HP500 Pump Combo

This is Proline’s largest pump as of this printing. It has a 3” intake and a 2” discharge. It develops considerably more pressure and volume than the other 8 to 9 horsepower pumps. This is the standard pump on Proline’s single engine 5” dredge and twin engine 6” dredge.

Pump Specifications: HP500 – 474GPM at free flow, 330GPM at 30PSI, 288GPM at 40PSI +/- 3%
