AKG C1000 S Microphone

The updated version of the C1000 S multipurpose small-diaphragm condenser microphone is extremely popular for its versatility. It is suitable for recording and live-sound applications as well as for ENG/EFP and video productions. Its gold sputtered capsule housing makes the microphone extremely rugged against humidity. If no phantom power is available, the C1000 S can be powered by two standard AA batteries for up to 120 hours. More versatile than ever before, the new C1000 S features a bass-cut switch and a switchable -10 dB pad.

The polar pattern can quickly be switched from cardioid to hyper-cardioid. Three different frequency settings are adding more clarity to speech and instrument sounds.

Gold sputtered microphone capsule and XLR pins
give high immunity against humidity

Powered by internal AA batteries or by phantom power
for use with any equipment and every application

Bass cut and -10 dB switchable
for amazing versatility in every situation

Presence boost adapter
provides three frequency settings for different sound sources

Unique polar pattern converter
allows the microphone to be switched from cardioid to hyper-cardioid
