Minelab Gold Monster 2000 Metal Detector

GOLD MONSTER 2000 tracks ultra-fine gold with sharper precision in mineralized ground using Minelab's Multi-Au™ technology, which combines VLF sensitivity and a Pulse Induction soil handling engine. Echo Wave™ Audio makes it easier to identify valuable targets by distinguishing weak gold signals from hot rocks, iron trash and interference. A real-time Gold Chance Indicator provides visual feedback on the likelihood of detecting gold versus junk, while the carbon-fibre telescopic shaft delivers portability without sacrificing durability.

Includes:

Minelab Gold Monster 2000 Metal Detector
