dbx 166XS Compressor-Limiter-Gate

Bring a more professional sound to your mix
Adding a dbx® 166xs Compressor/Limiter/Gate to your live sound rig or studio gives you more dynamic control to help create a more polished, professional sound. Having compression in your audio chain gives you the ability to smooth out uneven levels, add sustain to guitars and fatten up your drums. It also makes it easy to bring vocals to the front of your mix – adding greater clarity and making them stand out from the surrounding instruments. To protect your expensive amps and speakers the PeakStop® limiter provides an absolute ceiling for peak excursions or large transients that could damage your equipment.

dbx knows compressors…after all we invented them! The 166xs is the latest in a long line of the world's most successful compressors from the inventors of the technology. Its patented Overeasy® compression technology provides smooth and musical performance while the AutoDynamic™ attack and release controls, found only on dbx compressors, puts great sound within easy reach. The 166xs can operate in stereo or dual-mono modes, has true RMS power summing and features quality XLR and 1/4″ TRS inputs and outputs. It cuts no corners on visual feedback with gain reduction metering and easy-to-read backlit switches.

Furman CN-1800S Power Conditioner-Sequencer

Call us at 800-478-1994 for all your Furman Contracting needs with sequencers and remote ports; CN-1800S, CN-2400S, CN-15MP and CN-20MP. This product is not allowed to be sold online by authorized Furman dealers, so please call for pricing and availability.

Designed for Commercial A/V Installers, the CN-1800S combines robust control capabilities via SmartSequencing™ Technology, advanced AC protection, AC noise filtration, and optional compatibility with the BlueBOLT® Remote Power and Energy Management Platform (BB-RS232 adapter required, sold separately).

The new CN-1800S is one of the first products to feature Furman's SmartSequencing™ technology, which allows large and complex A/V systems to be safely powered on and off with a simple press of a button or turn of a key, even by nontechnical personnel. SmartSequencing's bidirectional communications between installed units enables a primary unit to control and sequence multiple secondary units, ensuring multizone electronic systems are powered on and off safely and dependably from a single control point across an entire installation. Units can be connected via current loop at runs of more than 1,000 feet with backwards compatibility with Furman's legacy sequencers.

In addition, the CN-1800S offers robust control options, equipped with RS-232 ports and command sets for integration with control systems. An optional RS-232-to-Ethernet adaptor (sold separately) adds full IP-addressability to the unit, allowing it to be controlled, programmed, and monitored from a smartphone, tablet, PC, or any Web-enabled device via Telnet, direct HTTP connection, or Panamax/Furman's BlueBOLT®-hosted remote power and energy management platform.

Mackie Onyx 1640i Mixer

Discontinued

Please see a possible alternative: Mackie ProFX22v2 Mixer

The 16-channel 1640i is the flagship mixer of the series featuring a full 16 mono mic/line channels each with 4-band dual sweep Perkins EQ, a whopping six aux sends each with pre/post and solo capability, 4 sub groups and a powerful master section. Despite its large channel count, the 1640i is compact, rack mountable and features our renowned flexible RotoPod™ design, allowing the mixer to be housed in any configuration – from custom studio furniture, live sound installs or even post production machine rooms. The 1640i's full-featured 16×16 FireWire capability allows the user to route all channels, aux

sends, sub groups and master L/R to their favorite DAW. However, the true power of the 1640i lies in its ability bring back the full 16 channels of FireWire output from your computer directly into the channel strips – for a true tape style mix down.
