The Proline 2.5" combo has become very well accepted with many

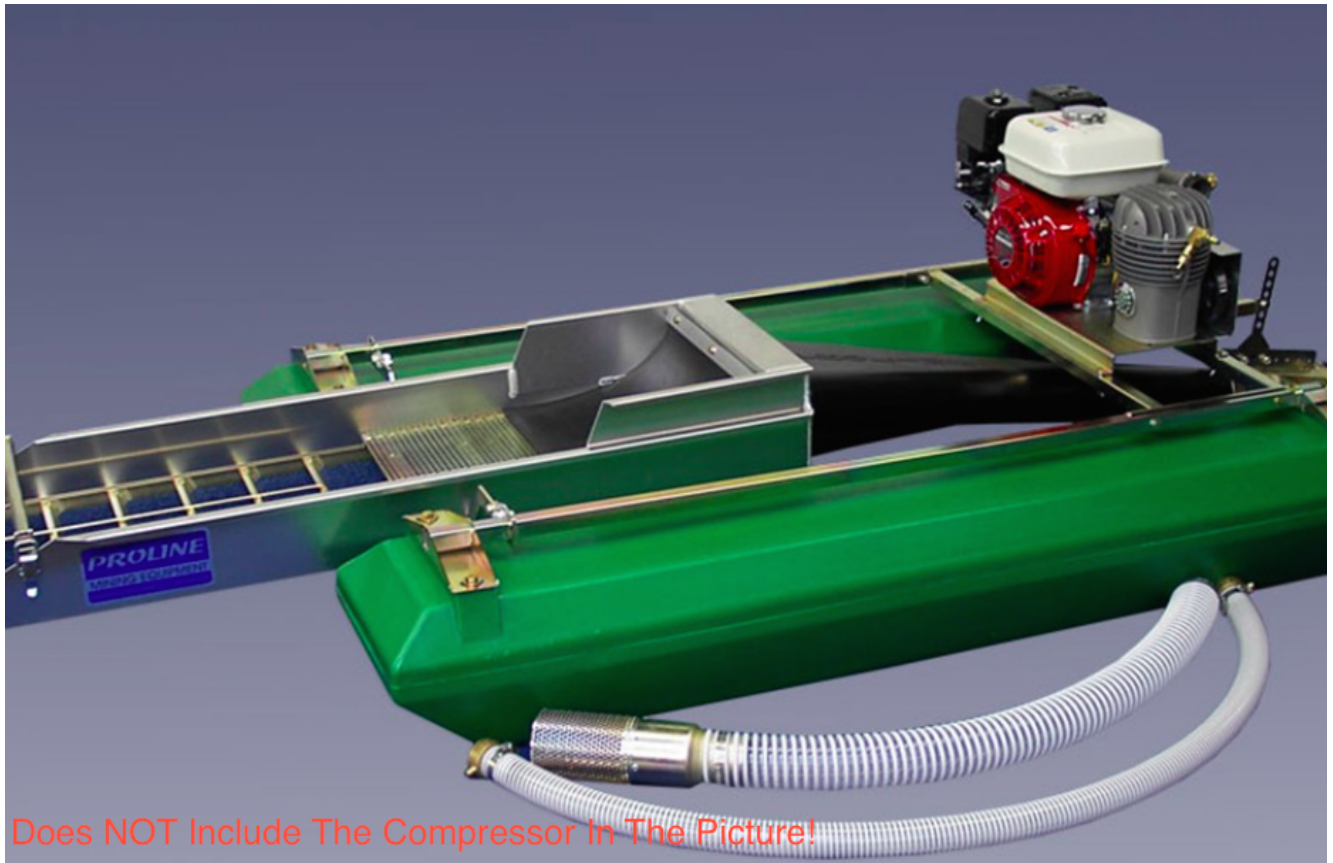

prospectors who feel it's the perfect size dual-purpose machine. When this unit is being operated as a gold dredge, it's capable of processing in excess of five cubic yards of material per hour. It's also the smallest combo that can handle a continuous feed with a standard size shovel, making it the perfect size for one or two people.

NOTE: Color of hopper will randomly be blue, green, or red.

Years Of Trouble-Free Service With Unmatched Performance

When Proline Mining originally designed the Proline 3" gold dredge, they set out to build a machine that they felt addressed most of the problems associated with this gold dredge size.

The light weight, portability and affordability of

Proline's 4" gold dredge makes it appealing to both the weekend prospector and the serious dredger alike. Small enough to slide into a pickup, light enough to be packed into remote areas, the 4" makes an excellent one man gold dredge.

The 5" size always has been popular with dredgers who were looking for the perfect balance of portability with higher productivity. Smaller gold dredges simply can't process as much gravel and the larger dredges require more effort to get into those more remote areas where the richer gold deposits are. This is why the 5" gold dredge size is normally the smallest dredge chosen by the serious prospectors and professional dredgers.

Proline 6 Inch Dredge With Twin GX270 And HP500 Pumps (*Local Pickup Only)

The Proline 6" gold dredge is one of our personal favorites. It is relatively lightweight and can be transported and assembled with little more effort than that required for a 5" dredge, yet, it is capable of processing several times more material than those smaller dredges. The 6" gold dredge is ideally suited for use as an exploration and sampling unit for larger mining projects and is also capable of being the

primary source of gold recovery in smaller operations. In our opinion, the 6" is the largest gold dredge that can be effectively operated by one man, however, a two-man team would allow the gold dredge to be used to its fullest potential.
