DigiTech XBD Bass Overdrive

DigiTech XBD Bass Overdrive / Distortion pedal.

The Bass Driver™ features three different bass overdrive distortion pedal models to select from. These can be morphed to create new multi-model bass -overdrive sounds.

Level -adjusts the overall effect level.

Tone – uses special Spectral -Contouring equalization. This adjusts a broader range of frequencies, which provides greater tonal control than is found in typical stompbox tone controls.

Blend – adjusts the mix of the dry signal with the effected

signal.

Morph – selects or morphs through 3 overdrive models, including the TS9 Tube Screamer™, the Rat™ and DigiTech's DigiFuzz™.

Dual Outputs. The Normal output is for connecting directly to the input of your bass amplifier. The Mixer output utilizes CIT™ and is for connecting directly to a mixing board or headphone preamp.
