## **DigiTech XHP Hyper Phase Pedal**

DigiTech XHP HyperPhase 7-Mode Phaser

The Hyper Phase<sup>™</sup> and the Turbo Flange<sup>™</sup> each deliver 7 operational modes, instead of the typical one mode only that you find in some other pedals. These operational modes are easily selectable using the mode control allowing you to choose from a selection of awesome voicing sounds, triggering feature, and useful step functions. Now you are no longer limited to a one-trick pedal. You can dial in the exact phaser or flanger sound you want! Both the Hyper Phase<sup>™</sup> and the Turbo Flange<sup>™</sup> each have Speed, Depth, Regen, and Mode controls. Outputs for both pedals include Left/Mono and Right.

7 different phase types

Triggering and step capability

Stereo and switchable CIT<sup>™</sup> Cabinet Modeling putputs
