DigiTech XMM Metal Master Metal Distortion Pedal

DigiTech XMM Metal Master Metal Distortion

Metal Master™ Heavy Metal Distortion Pedal

The new Metal Master can morph between various different amp distortion sounds for a whole new level of sound creativity. Now you don't have to settle for a one-trick-pony distortion stompbox. It also has Spectral- contouring Equalization which gives you wider, stronger EQ control than ever before. And that's not all! The Metal Master not only has a normal output,

it also has a second output that has cabinet emulation so you can go direct to board. Name anyone else with those features!

Metal distortion morphing

Spectral-contouring EQ

Normal & CIT Cabinet Modeling output

Product Short Description :

Don't settle for one distortion pedal when you can have 3 built into one stomp box! Introducing the Metal Master pedal from DigiTech. This pedal will give you the arsenal you need to tear the heads off of your crowd!

Use the Morph knob to morph between a smooth high gain tone, to a scooped midrange sound, all the way to a punchy mid range heavy metal sound that will cut through ANY mix!

You strive to make your music unique and DigiTech gives you the power to create that unique sound in one pedal. In order

to give you more options than anyone else and further refine your tone, DigiTech put in separate low and high spectral-contouring EQ and dual amp/mixer outputs with optional cabinet modeling circuitry. All of this in a rugged metal chassis that will stand the abuse of the road.
