Fender MTG Tube Distortion Pedal

Many pedals try to emulate the sound of tube breakup; we decided instead of emulating tube distortion, we'd use actual

vacuum tubes and give you the real deal in a compact pedal. The heart of the MTG’s design is a NOS (New Old Stock) US-made 6205 preamp tube. 3-Band EQ with Tight control and switchable boost—with its own Level and Boost controls—makes it easy to dial-in just the right sound.

Every Fender effects pedal is crafted from lightweight, durable anodized aluminum-they’ll easily withstand the rigors of touring.
