Fender Smolder Acoustic Overdrive Pedal

It’s tough to add overdrive to acoustic guitars—not only can it sound un-musical, it can also cause tone-destroying

feedback. Designed specifically for use with acoustic instruments, the all-analog Smolder® Acoustic Overdrive elegantly solves these issues with Fender know-how. To soften the bright attack of a piezo pickup we included a Pickup Compensation control that smooths out the highs. The Drive knob controls the amount of distortion, while 3-band EQ and Filter controls let you shape your sound to taste. We even included cabinet simulation to add some flavor when plugged into a full-range acoustic amp or PA.

Designed by our in-house team of experts, the Smolder® Acoustic Overdrive is an all-original Fender circuit. The chassis is crafted from lightweight, durable anodized aluminum, and the Amp Jewel LED gives your pedalboard the classic Fender look. The switchable LED-backlit knobs show your control settings on a dark stage at a glance.

Every Fender effects pedal is crafted from lightweight, durable anodized aluminum-they'll easily withstand the rigors of touring.

Model Name: Smolder Acoustic Overdrive Pedal
Model #: 0234550000
Series: Fender® Pedals
Country Of Origin: CN
Material: Anodized Aluminum

Power Requirements: 9-Volt DC Negative AC Adaptor (Not Included) or 9-Volt Battery

Part# 0234550000

UPC 885978054824

Price: $179.99

SKU: 7654

Categories: Pedal Effects

Product Short Description :

Acoustic distortion pedal
Pickup Compensation control
Drive control
3-band EQ and Filter controls
Onboard cabinet simulation
