LT 11-46 #2034

Dean Markley Blue Steel Acoustic Guitar Strings, Light Gauge Brilliant Stainless Steel, Cryogenically processed electric strings for two to three times the life of regular strings.

No need to consult a genie. Just pick up a pack of Blue Steel strings.

Crafted of 92% Copper and 8% Zinc, Blue Steel acoustic strings are cryogenically frozen with a blast of liquid nitrogen which gives them these special, if not magical qualities. By freezing our strings down to -320°F, we tighten the molecules, minimizing microscopic gaps. This process removes transient frequencies that produce harsh highs and muddy lows, creating a more consistent string, with true tone and longer life.
