Fender American Acoustasonic Telecaster Black With Gig Bag

The American Acoustasonic™ Telecaster® embodies the spirit of purposeful innovation that Fender was built on. From acoustic

shape-shifting to electric rhythm tones, this powerful guitar uses a revolutionary Fender and Fishman®-designed Acoustic Engine to deliver new sonic expression from the studio to the stage.

Elegantly simple, the Acoustasonic Telecaster was designed to inspire – mixing future technology with organic feel and playability as a way to connect artists to their music. The fully hollow body features an integrated forearm contour and our patent-pending Stringed Instrument Resonance System (SIRS) – designed to deliver a naturally loud voice with lively harmonics. A smooth-playing mahogany neck and open-pore satin finish make this cutting-edge guitar comfortable and easy to play. On stage the Acoustasonic Telecaster eliminates many of the challenges associated with playing an acoustic guitar live by cutting out feedback, and making it easy to access the sounds you need without switching instruments. The Acoustasonic Telecaster is powered by the Fender and Fishman®-designed Acoustic Engine – proprietary blend of classic analog and future technologies that optimize the guitar's natural sound, and then modify the resonance to deliver a curated collection of voices. These acoustic and electric voices can be played solo, or blended via the Mod Knob to create new sounds. They can also be used simultaneously, courtesy of the Fender Acoustasonic Noiseless™ magnetic pickup.

Handcrafted in Corona, California, at the same factory that makes Fender's iconic electric instruments, the Acoustasonic Telecaster represents the next era in Fender craftsmanship and innovation – designed for fearless artists who want an inspiring instrument with limitless new sounds and a great Fender feel.

Model Name: American Acoustasonic™ Telecaster®, Black
Model #: 0972013206
Series: Acoustasonic
