Gretsch G2655 Streamliner Center Block Jr Flagstaff Sunset

The secret to the Streamliner’s sound is twofold; the Broad’Tron humbucking pickup and the spruce center block. Specifically designed by the expert engineers at Gretsch for the Streamliner, the high-output Broad’Tron humbucking pickup spawns robust lows, pristine highs and a throaty midrange for a unique tone that blends well with other instruments in a band context. A lightweight spruce center block runs the length of the body, reinforcing the top while eliminating undesirable feedback for volume-friendly performance on modern stages. The Streamliner’s sonic power is harnessed and shaped by the traditional control layout; neck and bridge pickup volume controls, a master tone control, master volume control and three-way pickup switching. A fast-playing 12”-radius rosewood fingerboard with elegant pearloid block inlays and 22 medium jumbo frets sits atop the white-bound nato neck with a thin “U”-shaped profile; ideal for chord work or fiery riffing. Enjoy rock-solid tuning stability courtesy of the stylish Gretsch “V” stoptail tailpiece, Adjusto-matic™ bridge with an anchored base and synthetic bone nut.

All the classic eye-catching style you’ve come to expect from Gretsch is here; vintage-style black control knobs, F Holes, elegant two-ply white and black body binding, slick-looking nickel hardware, single-ply black pickguard with Gretsch logo and arched laminated maple construction. Easy to play while rocking out thanks to its smaller body, the G2655 Streamliner Center Block Junior Double Cutaway is a phenomenal instrument for the modern musician who wants to control the stage and the audience while standing out from the pack.

Model Name: G2655 Streamliner™ Center Block Jr. with V-Stoptail, Broad’Tron™ Pickups, Flagstaff Sunset
