Product Short Description :

The miracle of volume! With its mahogany “long-body” design and comfortable soft-“V” neck, this faithful reissue of the 1930s classic sounds and plays like a million bucks. The vital feature of all Gretsch resonator guitars is the all-new Gretsch “Ampli-Sonic” diaphragm (resonator cone), which is hand-spun in Eastern Europe from nearly 99 percent pure aluminium and yields an impressive quality and volume of tone.
