Soundcraft Notepad-12FX Mixer

The Notepad-12FX 12-channel mixer makes it easy to get legendary Soundcraft sound for your music, podcasts or videos. The Notepad-12FX combines professional-grade analog components, renowned HARMAN digital signal processing and a

built-in USB audio interface to use with your favorite Mac or PC editing software. Whether you're a singer-songwriter or a podcaster, the Notepad-12FX mixer offers best-in-class features like Lexicon® effects, so you can bring a level of polish to your creative productions that's sure to impress.

For over 40 years, audio professionals have trusted Soundcraft mixing solutions for pristine sound quality and reliable performance. Notepad series mixers continue this tradition with professional-grade Soundcraft microphone preamps, convenient XLR and 1/4" connectors, and durable metal enclosures built to stand the test of time.

You'll find yourself right at home with Notepad's traditional channel strip layout. Aux sends and three EQ controls per channel give you a level of convenience often reserved for larger consoles. A rotary headphone volume control makes it easy to adjust your personal listening level, while a master fader level with LED metering provides precise control over your master output signal. Designed for home studios, rehearsals, live performances, and podcast production, the Notepad series provides a layout that's familiar to audio professionals yet easy to grasp for beginners.

The deceptively compact Notepad mixers easily fit in a gear bag and provide plenty of capability for writing sessions, rehearsals and gigs. Notepad mixers are engineered to provide iconic Soundcraft performance and allow you to connect your favorite gear like microphones, guitars, keyboards and more.

The combination of premium Soundcraft components and the built-in USB audio interface make Notepad the ideal centerpiece for your podcasting workflow. The Notepad-12FX gives your production a level of polish typically achieved by recording studios. Plus, ducking, when enabled, automatically lowers the volume of background music when audio is detected by the main source, allowing your voice and message to stand out. From capturing monologues to interviews with multiple

panelists, Notepad mixers are designed to help you share your ideas with the world.

The Notepad-12FX features premium, studio-quality effects by Lexicon that help you achieve truly professional sound without additional plug-ins or equipment. Enhance your projects with reverb, chorus, or delay with tap tempo control, backed by industry-leading signal processing technology built into the Notepad’s DSP engine.

Notepad’s integrated USB audio interface allows you to easily record, edit and play projects using your favorite audio software. By combining Soundcraft legendary audio performance with HARMAN signal processing and the built-in USB interface for your computer, Notepad offers the best of both analog and digital audio in a no-compromise solution.
