Soundcraft Signature 10 Mixer

All Soundcraft Signature Series consoles incorporate Soundcraft’s iconic Ghost mic preamps, directly drawn from the company’s top-of-the-line professional consoles, to deliver extraordinary audio quality with high headroom, wide dynamic

range and exceptional resolution and clarity with a superb signal to noise ratio. They employ Soundcraft’s Sapphyre Assymetric EQ for perfectly equalizing every vocal and instrumental element in a mix with the unmistakable musicality inherent in every Soundcraft console, plus the GB Series audio routing technology famous in thousands of live venues worldwide.

They all include a wide variety of built-in Lexicon studio-grade reverb, chorus, modulation and other effects and dbx limiters on the input channels. The consoles offer XLR and switchable Hi-Z inputs that enable guitars, basses and other instruments to be directly connected.

All the consoles come with a 2-in/2-out USB interface. Accompanying the consoles are free downloads of the Lexicon MPXL native plug-in and Ableton Live 10 Lite.

In addition, the consoles feature smooth, premium-quality faders with GB® Series audio routing with flexible pre/post switching on each Aux, and subgroups with powerful routing and switching options as well as dedicated outputs. The Signature Series are built using tour-grade robust metal construction and top-quality components and have an internal universal power supply.

The Ableton Live 10 Lite software is an included download with all Signature Series consoles. Feed your creativity with this fast, flexible sequencing and workstation. From built-in instruments, sounds and effects to recording and mixing features, Live 10 Lite gives you everything you need to create, produce and perform.
