# Keene Nome Beach Box Highbanker With GX120 Honda And Miracle Mat 176244

Great for cleaning the concentrates for large trommel operations down to super concentrates.

Can be used to highbank in areas that have large amounts of

black sand and garnets that plug up standard riffle configurations.

All sluices are lined with our new rubber molded “Miracle Matting Riffle “ that is acclaimed to be the most effective gold separating device on the market. The sluice box is 6 feet in length and 24 inches wide. The sluice breaks down into two connecting sections, each with supporting adjustable legs. The top hopper is designed with 3/16 inch woven wire mesh to reduce the size of material entering the recovery box. Capacity 1 1/2 cubic yds. per hour.

**Product Short Description :**

This high production power sluice has been designed and tested for the beaches of Nome Alaska where ultra fine gold recovery and larger capacities are required. Designed to accommodate additional connecting sluices for prolonged run time and greater capacity.

Hand priming pump makes priming the high pressure pump easy.

20ft. intake hose enables you to reach into the ocean to provide consistent water for the pump.

50ft. pressure hose allows for highbanking to continue even when the tide is going out.

Honda 4hp engine.
