Warranty: 2 Year, Limited Parts/Labor

Garrett AT Gold Manual

Price: $639.99

SKU: 7033

Categories: Metal Detectors

Tags: Gold Detectors, Gold Prospecting Supplies

Product Short Description :

Headphones are included with the Garrett AT Gold (Waterproof headphones sold separately)

True All-Metal mode offers deepest detection depth and sensitivity on the smallest nuggets.

Simultaneously shows the target’s conductivity and the detector’s discrimination pattern.

Designed for use in wet, humid and dusty environments.

Weatherproof housing can be immersed in water to 10-foot (3m) depth.

Numeral scale from 0 to 99; indicates a target metal’s conductivity for increased ability to distinguish targets from each other.

Allows the user to manually adjust the audio threshold (constant background sound) to better hear targets.

Proportional audio response and Tone Roll Audio features

provide more target information.

Allows user to hear discriminated iron and to audibly identify problematic flat iron objects like bottle caps and washers.

A Garrett exclusive feature that allows user to audibly identify iron objects even while operating in a True All Metal Mode.

There is an automatic feature that allows user to quickly ground balance the detector in mineralized soil conditions.

Non-Motion All-Metal Mode is used to precisely locate a detected target’s location in the ground.
