Minelab Pro-Find 15 Pinpointer Metal Detector

PRO-FIND Series pinpointers help you to accurately locate targets inside a small hole or crevice where a metal detector coil cannot fit. This results in smaller holes, less environmental disruption and faster target recovery time.

Features:

Splash proof design: Rugged, splash proof design for rainy conditions. The perfect companion for a waterproof detector.

Audio indication: Audio tones intensify as the probe approaches the target, making target location easier than ever.

High visibility – with lost-alarm: The PRO-FIND’s bright yellow handgrip is clearly visible for easy location, so you

won’t leave it behind after you dig. Quickly locate your forgotten pinpointer with the handy lost-alarm.

Holster included: Semi-rigid holster that attaches to most belts will keep your PRO-FIND at the ready.

Probe side sensitivity: Probe side detection area (360 degrees) allows targets to easily be located in the walls of the hole.

Auto power off: To save battery life, the PRO-FIND 15 switches off after eight minutes of inactivity.

VLF Technology: VLF (Very Low Frequency) is a conventional single frequency sine wave transmission technology. This reliable design has greater noise immunity to variable ground conditions.

Detector Interference Free technology: The advanced design of the PRO-FIND 15 removes false signals and noise, commonly associated with other pinpointers. DIF technology eliminates interference with an operating metal detector, when it is switched off, by disengaging the coil’s magnetic field.

Specification
Target Identification: No
Sensitivity: Fixed
Waterproof: Splash proof only
Audio Indication: On only
Vibration indication: No
LED Flashlight: No
Battery: 9V PP3 (not included)
Battery Life: 30 hours nominal
Length: 237 mm (9.3″)
Weight: 193 g (6.82 oz)
Accessories: Holster

Part# 3226-0002
