Minelab X-TERRA 305 Metal Detector

The X-TERRA 305 is the solid no-nonsense introduction to the new generation Minelab X-TERRA Series. A lightweight, easy to use, coin and treasure-hunting detector designed for the

hobbyist who does not want or need the top of the range machine. The X-TERRA 305 is suitable for the whole family and there is even a short shaft available for keen youngsters. Despite being ultra lightweight and so easy to use there is no compromise on quality or performance – Minelab's designers used innovative, lateral thinking and the very latest in digital components to design the X-TERRA Series of detectors. The X-TERRA 305 is now packed with new features, functionality and enhanced setting options. This detector delivers results, value and more…in fact some might think that we made it too good!!! A no nonsense detector perfect for those seeking a high performance entry-level detector.

Features:

Minelab's proprietary True Digital VFLEX technology, then new class of single frequency detectors – you can change the operating frequency simply by changing coils. Compatible with Medium Frequency (7kHz) and High Frequency (18.75kHz) coils – 6 accessory coil options offer increased versatility.

Accurate Ground Balance capability with manual adjustment of 0-20, allows the user to adjust to ground mineralization easily. 2 preset patterns, that can also be customised, plus All-Metal mode. Choice of 1,2 or 3 tone ID's plus multi-tone Target ID (12) response. This allows greater flexibility in deciding how target signals are represented.

Threshold adjustment, with a range of -5 to 25 allowing the user to set threshold to levels where slight variations from either very small shallow, or very large deep, targets can be noticed.

Noise Cancel function with 3 manual settings allowing the user to pick the quietest channel for detecting.

Rapid recovery Pin-Point with variable tone and graphical indicator.

Target Volume adjust (0-10) allowing you to get more definitive audio information on each target.

Depth indicator, updates continuously, even in Pinpoint mode.

Positive reflective LCD display.

Runs on just 4 x AA batteries.

Ultra lightweight, balanced design (only 1.3kgs).

Minelab does NOT include the short shaft anymore as described in the video below.
