Shubb C1 Steel String Capo

For 6-String Guitar

When the Shubb capo was first introduced more than 30 years ago guitarists throughout the world fell in love with it. They're still in love with it today. We've given it a few tweaks through the years, but its basic mechanical principle remains the same: a unique over-center locking mechanism that provides an unrivalled combination of power, speed, accuracy and ease of use. One smooth flip of the lever locks it securely in place, and removes it just as quickly. And the Shubb capo is BY FAR the best at not creating tuning problems. Its soft, resilient rubber is specially designed to work just like a fingertip, so it doesn't bend the strings over the frets. Its closing action is just like your hand, so it doesn't pull the string off center. As a result, no re-tuning is necessary! This year our standard line of capos received its biggest tweak yet: we've upgraded our most popular models – the "C" series nickel plated capos – to include the design features formerly available only on our deluxe, stainless steel models. And the price remains the same!

Price: $29.75
